

## Xi Training Ltd PPE Management Services (Platinum)

**DURATION**  
3 / 5 year commitment

**REQUIREMENTS**  
Provide Info on existing  
procedures  
Provide employee PPE  
information

### Xi Training PPE Provision Background

Xi Training Ltd are a leading supplier and reseller of climbing kit, PPE (Personal Protective Equipment) & all weather clothing suitable for climb at work. We stock a variance of climbing & PPE products suitable for all budgets & businesses. Xi Training provide Equipment from all manufacturers of PPE and are able to select the best products from the market & design our own product packages to meet client needs. We only supply PPE & Climb kit that has been field tested by us allowing you to buy with confidence. Xi Training offer a fully managed PPE supply & PPE inspection service, including allocation, inspection & tracking of PPE Climb kit to your staff.

### Legal Requirements for PPE

Under the 2009 HSE Standards for PPE, 1992 PPE equipment at work Regs, LOLER and PUWER regulations, there is a legal requirement for PPE to be inspected before each and every use, and by a competent person annually or as stipulated by manufacturer's instructions. Xi Training's equipment specialist will develop an inspection regime specific to your company, ensuring that all PPE kit is inspected and documented as per the requirements of the law. Our documentation system issues each piece of PPE a unique I.D. code so that it can be tracked (each piece of kit can even be allocated to a specific employee). By allocating PPE kit to specific individuals, it can be easily identified and recalled with minimum fuss at the point in time when the next inspection is required.

### PPE Allocation and Inspection Reporting

All inspected items will be accompanied with up to date and comprehensive inspection records tailored to company specific requirements. To help you to maximise the productivity of your employees, we will ensure you are informed when inspections are due, what it is that requires inspecting, as well as when PPE kit is coming to the end of its useable life - this will allow time to arrange inspections or replacements so as to minimise time when employees are without essential work PPE equipment.

### Platinum PPE Management Service

The aim of the PPE Management Platinum Service is to streamline the inspection for our clients into a more effective and efficient timescale, to provide savings and to tighten up the process to ensure no kit is rendered unusable by clients and staff. The service provides the additional benefit of ensuring clients hold full compliance with legislative regulations regarding the safe use of PPE and safety systems.

### Tailored PPE Solution

The service that Xi Training offers for clients can be fully tailored to fit the needs of the organisation, work industry, PPE type and PPE volume. This includes an array of customisable reporting tools and data logging techniques that take into account company structure and team comprise.

### Total PPE Supply and Management

For PPE that has come to the end of its useable life, Xi Training can manage the full and appropriate replacement of PPE on the clients behalf. This includes managing the purchase of PPE from the various suppliers of PPE, taking delivery of the kit, repackaging the PPE as required, logging the equipment and allocating it against an owner/employee on the PPE management system, reporting for the new kit in summary for the kit owner, and coordinating the delivery of new PPE back to the client.

As a result of implementing the PPE Management Platinum Service, clients can drastically reduce and improve the administration, reporting and costing of the whole process of allocating and tracking PPE within the organisation. By making a number of small operational adjustments in conjunction with implementing our Platinum service plan, our PPE management software can solve the need for an increased legislative interest in ensuring all PPE in use within an organisation is inspected, accounted for and more importantly is safe to use.
